

INLAND BAYS/ ATLANTIC OCEAN BASIN *Assessment Report*

June 2001

*Delaware Department of Natural Resources
and Environmental Control*

Acknowledgments

This report, compiled by the Department of Natural Resources and Environmental Control's Inland Bays/Atlantic Ocean Whole Basin Management team, represents a comprehensive assessment of the Inland Bays drainage basin including a portion of the Atlantic Ocean. This effort, overseen under the leadership of Ann Marie Townshend, a Senior Planner with the Division of Parks & Recreation, challenged scientists, engineers, planners, and managers from throughout the Department to merge all the available environmental data and information about this Basin into a single, comprehensive document.

The individuals that participated in this multidisciplinary initiative are to be congratulated for the time and talents that they devoted to this effort. The members of the Inland Bays/Atlantic Ocean Basin team include:

Parks & Recreation

*Ann M. Townshend
Rob Line
Chris Bennett*

Fish & Wildlife

*Rob Gano
Jeff Tinsman*

Water Resources

*Ron Graeber
Brad Smith
Ben Anderson
Blair Venables
John Kennel
John Schneider
Jack Pingree
Lyle Jones
Larry Pomatto
Sue Warrington
Bill Moyer*

Air & Waste Management

*Jim Poling
Matt Higgins
Emil Onuschak
Kevin Yingling
Keith Robertson*

Soil & Water

*Stephanie Breeding
Nancy Goggin
Thomas Barthelmeh
Chuck Williams*

Office of the Secretary

*Dennis Brown
Melinda Carl
Debbie Sullivan
Stephen Williams*

Support Staff

*Debbie Sullivan
Stanley Von Essen
Diane Miller
Lisa Vest*

Other Contributors

*Hassan Mirsajadi
Til Purnell
John DeFriece
Steve Smailer
Jim Bennett
Dave Fees
Jill Racz*

Center for the Inland Bays

*Ed Lewandowski
Kent Price*

The team members would like to extend a special note of thanks to Jill Racz, Emil Onuschak, and Jim Poling for assisting with the editing of this document. The team also appreciates the outstanding Geographic Information System mapping contributions made by Debbie Sullivan.

The Inland Bays/Atlantic Ocean Basin team members appreciate the support they received from their managers for allowing them to participate in this Whole Basin Management initiative. A special note of thanks is extended to Susan Moerschel for her willingness and support to have her employee, Ann Marie Townshend, serve as the Inland Bays/Atlantic Ocean Basin team leader.

A special thanks is extended to Sam McKeeman, formerly with the State Personnel Office, for providing the group with the knowledge and tools necessary to join together as a true team at the onset of this exciting endeavor.

The Inland Bays/Atlantic Ocean Basin team would also like to express a sincere note of appreciation to Charles Clark IV, Assistant Chief of the Nanticoke Indian Tribe, for providing the team with a very inspirational and motivating message about the need for everyone to work together to protect and restore Mother Earth. Assistant Chief Clark also wrote a series of quotes that are contained in a companion document, *The Inland Bays Environmental Profile*.

The U.S. Environmental Protection Agency provided funding to print this document.

CHAPTER 1: INTRODUCTION

1.1 Delaware's Drainage Basins	1
1.2 The Inland Bays/ Atlantic Ocean Basin Assessment	2

CHAPTER 2: ASSESSMENT

2.1 PHYSIOGRAPHY	5
2.1.1 General Setting	5
2.1.2 Geology and Geologic History	6
2.1.3 Modern Geology	6
2.1.4 Active Processes	8
2.1.4.1 Sea Level Rise	8
2.1.4.2 Shoreline Erosion	9
2.1.4.3 Coastal Storms	9
2.1.4.4 Surface-Water Circulation	10
2.1.4.5 Ground-Water Circulation and Saltwater Intrusion	10
2.1.5 Soils	11
2.1.5.1 Hydric Soils	12
2.1.5.2 Excessively Well-Drained Soils	12
2.1.5.3 Well-Drained Soils	12
2.1.5.4 Moderately Well-Drained Soils	12
2.1.5.5 Poorly-Drained Soils	12
2.1.6 Data Gaps and Recommendations	13
2.1.7 References.	13
2.2 WATER RESOURCES	15
2.2.1 Occurrences and Uses	15
2.2.1.1 Water Budget	16
2.2.2 Atmosphere	16
2.2.3 Surface Water	16
2.2.3.1 Drainage Basins	16
2.2.4 Ground Water	17
2.2.4.1 Aquifers	17
2.2.5 Water Quality	20
2.2.5.1 Surface Water	20
2.2.5.2 Ground Water	28
2.2.6 Data Gaps and Recommendations	30
2.2.7 References.	30
2.3 HABITAT & HABITAT MODIFICATIONS.	33
2.3.1 History	33
2.3.1.1 Prehistoric Human Impacts	33
2.3.1.2 Historic Human Impacts	33
2.3.2 Assessment of Current Habitats	34
2.3.2.1 Upland Habitat	34
2.3.2.2 Fragmentation of Habitat	34
2.3.2.3 Modern Forestry	34
2.3.2.4 Exotic Species	36

2.3.2.5 Non-Tidal (Freshwater) Habitat	36
2.3.2.6 Tidal Estuarine Habitat.	37
2.3.2.7 Ocean Habitat	42
2.3.3 Habitat Loss and Modification	43
2.3.3.1 Dredging	43
2.3.3.2 Sensitive/Rare Habitats.	45
2.3.4 Shoreline Protection/Loss of Shoreline.	45
2.3.4.1 Ocean Shoreline.	45
